**Disc Tumbler Line of Locks**

Kenstan expanded the Disc Tumbler **D** line of locks. Some of our **D** (54G) keyway and **B** (Kenstan B) keyway locks are now available in a removable core version. **Effective 07/01/2014**, our **B** keyway Core face will be made thicker to help prevent the keys from breaking when used as a pull. The **B** keyway locks severely limits unauthorized key duplication since key blanks are never sold.

All new orders without existing assigned key specifications will be made with our **B** keyway core.

The original **D** (54G) keyway locks and keys will still be available for purchase to match existing key systems.

Our large component inventory and assemble-to-order factory enables you to order door locks, drawer locks and sliding door lock types keyed alike, keyed individually or in groups, and master keyed using hundreds of key combinations. Kenstan maintains a historical database of keying records, giving you the ability to match key numbers to support the security needs of a specific end user.

Note: All keys are now sold separately. Please refer to our Disc Tumbler Key section for details.

**Delivery**

At Kenstan, we assemble every lock to order and strive to meet your requested in-house date. Our standard lead time is to ship within two weeks from the receipt of your order. Rush orders and emergency services are available.

**Plating**

The **D** line standard plating finish is Polished Nickel.

A wide range of special plating finishes is also available, including Satin Nickel, Polished Brass, Satin Brass, Statuary Bronze, Matte Black and Custom Finishes to match your showcase hardware.

**Please note**: Extended lead-time and plating lot charges may apply to Special and Custom finishes. Please call Kenstan for details.

**Key Control**

Kenstan can register your keys and maintain your key plans by store, retail department, showcase/cabinets, or office and we maintain a historical database of key numbers.

**Key Retaining vs. Non-Key Retaining Lock Function**

The **D** line standard operation is a non-key retaining function (non-captive), which means that the operating key can be removed in both the locked and unlocked position.

For higher security we recommend the key retaining (captive) function, which ensures that the key can only be removed in the locked position and cannot be accidentally left in the open/unlocked position.

**Designer Note**: For true captive operation, the use of our captive key locks must be coordinated with sliding door showcase design. The use of non by-passing sliding doors is recommended to restrict door movement and ensure key removal only when the doors are in the secure position.

Disc Tumbler B Controlled Keys

Since the beginning of 2007, our Disc Tumbler B (Kenstan B) keyway was made standard product offering. The B Keyway severely limits unauthorized key duplication since key blanks are never sold. Cut keys can only be ordered through the Kenstan factory. All new lock orders without keying specifications or specified key numbers will be assembled with the B keyway components and keys. To easily identify B keyway locks a “B” is marked on the Core face. Keys are sold separately from the locks.

Disc Tumbler “54G” Keys.

In an effort to minimize key proliferation, Kenstan does not include keys with D (54G) keyway locks. All keys must be ordered separately.

Kenstan recommends the purchase of our factory original keys to ensure smooth lock operation. Use of non-Kenstan copy keys will void the Kenstan Warranty on our locks.

Kenstan Control Keys are used to remove and replace the cores on Removable Core locks.

Since 1963, Kenstan Lock Company has manufactured several lines of high-quality showcase and cabinet locks, each with their own unique security features. Each year, we continue to enhance our existing product lines, while adding new products to meet the ever-changing needs of our commercial, industrial and retail clients. We also offer a wide range of door hardware locks, such as mortise and rim cylinders, as well as lever and tubular handles for fitting rooms, stock rooms, offices, etc.

Our product lines are complimented by Kenstan associates who are available to assist you with security layouts, keying plans and custom products as needed.

Each of our lines, and all of our products, are manufactured using the highest standards of quality and we stand behind each and every product we deliver. From the quality products assembled in our factory to our shipping and customer service departments, our goal is to provide the best service possible, from start to finish.

At Kenstan, we take pride in our reputation that has been built on quality products, reliability and the exceptional customer service that our clients depend on.

1. Pricing: Kenstan Lock reserves the right to institute price adjustments based upon fluctuation of material costs without prior notice. Orders, or balances of orders, that have not shipped within 6 months from the original order date may be subject to a price review.

2. Payment Terms: Payment must be made at time of purchase, unless otherwise approved by Kenstan with terms of Net 30 Days from the date of the invoice. A service charge of 1.5% per month will be charged on overdue accounts.

3. Shipping: Please be sure to specify your preferred shipping method on every order. For all orders received without shipping instructions, Kenstan will use our discretion to make carrier selection based upon the most economical method of shipment available to meet your request in house dates. Kenstan is not responsible for risk of loss or damage to products in transit with the selected carrier.

4. Deliveries: At Kenstan, we assemble every lock to order and strive to meet your requested in-house dates. Our standard lead time is to ship within two weeks from the receipt of your order. Rush orders and emergency services are available. Unless specifically prohibited in writing by the purchaser, Kenstan reserves the right to make partial shipments of any order.

5. Inspection: Kenstan Lock inspects all products in accordance with our standard quality control procedures. Upon receipt and inspection by the purchaser, any parts proven to be defective or not as ordered may be returned to Kenstan for repair or replacement following the conditions in the “Returned Goods” section (#6) below.

6. Returned Goods: Product replacement or account credit for any returned goods will be made solely at the discretion of Kenstan and will only be accepted upon the issuance of a Return Authorization number from Kenstan’s Customer Service Department. Merchandise proven to be defective, due to faulty material and/or workmanship, may be returned for full replacement or credit. Any product ordered incorrectly by the customer may be accepted for return subject to a 50% handling charge. Locks made with special or out-of-production parts are not returnable, unless prior arrangements have been made. Returned merchandise that is damaged in transit, due to inadequate return packaging, will not be accepted.

7. Warranty: Kenstan Lock warrants, for a period of one year from delivery, that our products are free from defects in material and workmanship and makes no other warranties, expressed or implied, including but not limited to the degree of security or the purchaser’s application or use of our product. Kenstan Lock Co. will not warranty any locks or parts that were modified outside of our factory. In the event of a product defect, Kenstan shall only be responsible to the extent of the cost of our product, and will not accept any claims for labor or loss of merchandise.

8. Cancellation: If all or any part of an order is cancelled before the completion of the product assembly by Kenstan, the purchaser shall be responsible for payment of all assembled items as well as any special parts ordered for items remaining unassembled at the time of cancellation. If pricing on the original order was based upon Kenstan’s quantity discount, a partial cancellation may affect the pricing on items already shipped and invoiced and a price adjustment will be made.

9. Catalog Dimensions and Sample Policy: Please be aware that all lock and part drawing dimensions carry a tolerance of plus or minus 1/16” and are for reference only. Please contact us for actual dimensions. All specifications are subject to change without notice. Samples products are available upon request.
